

Tomáš Jetelina

Cloud & Identity Governance Engineer

[email] · [phone] · linkedin.com/in/tjetelina · jetelina.cz · [city, country]

PROFILE

Cloud and automation engineer focused on Microsoft Entra ID governance, Azure infrastructure and DevOps tooling. Builds frameworks that make identity governance, access reviews and pipeline infrastructure scalable, secure and easy to maintain — turning manual, repetitive administration into automated, auditable processes.

CORE SKILLS

Microsoft Entra ID Governance

Azure Infrastructure & RBAC

Azure DevOps Pipelines (YAML)

PowerShell & Automation Scripting

Self-Hosted Build Agents & Docker

Conditional Access Policy Management

EXPERIENCE

[Job title] — [Employer name]

[MM/YYYY] – [Present / MM/YYYY] · [Location]

- [Add 2-4 bullet points describing responsibilities and impact]

SELECTED PROJECTS

Framework — Azure DevOps Pipeline Framework

- Reusable YAML template framework enabling API-driven governance, reset and association workflows at scale.

Entra ID Governance

- End-to-end identity governance solution covering service principals, users, groups, admin units, subscription RBAC, conditional access policies and privileged role management.

Self-Hosted Agents

- Docker-based self-hosted Azure DevOps agent infrastructure with scripted build/run pipelines for scalable agent capacity.

ACTIVE DIRECTORY EXPERIENCE

- Responsible for managing and maintaining the Active Directory environment of NN Group.
- Completed the in-depth "Windows Server Active Directory Internals and Troubleshooting" course at Gopas.
