## Identity & Cloud Automation Engineer

contact@jetelina.cz · linkedin.com/in/tjetelina · jetelina.cz · Prague, Czech Republic

### PROFILE

---

Cloud and automation engineer focused on Microsoft Entra ID governance, Azure infrastructure and DevOps tooling. Builds frameworks that make identity governance, access reviews and pipeline infrastructure scalable, secure and easy to maintain — turning manual, repetitive administration into automated, auditable processes.

### CORE SKILLS

---

Microsoft Entra ID Governance

Azure Infrastructure & RBAC

Azure DevOps Pipelines (YAML)

PowerShell & Automation Scripting

Self-Hosted Build Agents & Docker

Conditional Access Policy Management

### EXPERIENCE

---

#### Senior Identity DevOps Engineer — NN Group

2018 – Present · Prague

- I automate identity infrastructure — Infrastructure as Code for domain controllers and management servers across on-premises, Azure and AWS — after earlier roles in Active Directory operations, Citrix virtualization and Windows Server administration.
- Earlier roles: Active Directory DevOps Engineer, Citrix Engineer, Senior Windows Engineer

#### Server & Active Directory Administrator — Bosal Group

2015 – 2018 · Prague

- Managed Windows Server, Hyper-V/VMware and Active Directory infrastructure across the group's data centre and 20+ factories worldwide.

#### Windows Server Administrator, EMEA — Mallinckrodt

2013 – 2015 · Prague

- Sole EMEA domain administrator, managing server infrastructure across roughly 30 sites alongside Asia-Pacific and US teams.

#### IT Support Engineer — Monster

2010 – 2012 · Prague

- Ran local IT infrastructure and support, and served on the EU security and workflow teams.

#### Network Administrator & IT Helpdesk — Orco Property Group

2008 – 2010 · Prague

- Administered the corporate domain, servers and Active Directory, and provided 24/7 support for a chain of European hotels.

## **Network Administrator — Raiffeisenbank CZ**

*2006 – 2008 · Prague*

- Managed domain infrastructure, Active Directory and Exchange, and supported corporate users.

## **SELECTED PROJECTS**

---

### **Pipeline Automation Framework**

- A reusable DevOps pipeline framework built around modular templates and capabilities, powering API-driven governance, reset and association workflows at scale.

### **Identity Governance Solution**

- An end-to-end identity governance solution for Microsoft Entra ID covering service principals, users, groups & admin units, subscription RBAC, conditional access policies and privileged role management.

### **Build Agent Infrastructure**

- Docker-based self-hosted build agent infrastructure, with scripted pipelines to build, run and maintain scalable agent capacity.

### **Active Directory Experience**

- Alongside my current work, I have extensive, ongoing hands-on experience with Microsoft Active Directory. I completed the GOPAS course [Windows Server Active Directory Internals and Troubleshooting \(GOC171\)](#), and I manage and maintain the Active Directory environment at NN Group.
